

ANTI-RATTLE CLAMP

ROCKSTAR™ Anti-Rattle Clamp prevents shifting, rattling and vibration from 2 in. hitch-mounted accessories by compressing accessory against the inside wall of the receiver. Constructed from durable aluminum with zinc-plated hardware for long-lasting performance.

See inside for instructions.

ANTI-RATTLE CLAMP INSTRUCTIONS

TOOLS: 9/16" wrench, protective eyewear.

A. Pull receiver clip and pin to remove ball mount from receiver. Slide anti-rattle clamp on ball mount. Ensure clamp bolt faces vehicle.

NOTE: If installing hitch mounted mud flaps, place mud flaps on ball mount shaft before the anti-rattle clamp. Adjust mud flaps and clamp as needed.

B. Insert ball mount into receiver and secure with pin and clip. Engage and tighten bolt on receiver, then tighten nut on clamp.
