

HARD TRUCK BOX COVER SPECIAL SIDE RAIL INSTRUCTIONS

2007-ON TOYOTA TUNDRA WITH DECK RAIL

Read and follow these special instructions along with the standard instructions carefully before installing or using this cover.

NOTICE TO INSTALLER: Even if familiar with product, read special instructions prior to installation as improvements may be made without notice. Always handle components with care. When done, these special instructions must be given to the consumer.

NOTICE TO CONSUMER: Before using this product, read special instructions. Save these special instructions for future reference.

PREPARATION

TOOLS NEEDED

- Ft-lbs Torque wrench with 1/2" socket
- Protective eyewear
- 1/2" Wrench

⚠ CAUTION: Over torquing hardware may damage components.

NOTE: Hardware appearance and components may vary.

1: REMOVING EXISTING HARDWARE

A. Remove deck rail system plug at end of channel near tailgate. If tie downs installed in deck rail, loosen and remove for now.

2: INSTALLING SIDE RAILS

A. When inserted into deck rail, position pre-assembled clamps and hardware as illustrated.

B. Refer to the standard instructions for clamp positions.

NOTE: For trucks equipped with tie downs, position them as desired between clamps.

C. Reinsert deck rail system plug at end of channel near tailgate.

D. Position side rail per standard instructions between clamps and inside lip of box.

E. Hold side rail level, clamp as shown and then tighten clamps. When tight, clamps should hold side rail level.

F. Repeat Steps 1-2 to install side rail on opposite side.

G. Torque all clamps to 25 ft-lbs.

H. **For remaining cover installation, refer to standard instructions.**
