Danger: Never exceed your vehicle manufacturer’s recommended towing capacity.

**Make:** Chevrolet, GMC

**Model:** Tahoe, Yukon

**Style:** SUV

**Years:** 2015

**Weight Carrying:**
- Trailer Weight: 5,000 LBS.
- Tongue Weight: 500 LBS.

**Gross Load Capacity when used as a straight line pull:** 9,000 LBS MAX.

**Installtion Tips:**
1. Before you begin installation, read all instructions thoroughly.
2. To ease installation, 2 people may be required.
3. Using proper tools will greatly improve the quality of the install and reduce the time required.
4. Need help or have some questions? Call technical support at 800.798.0813

**Installation Requires:**
- Ratchet
- Torque Wrench
- Socket
- Power Drill
- Drill Bit 17/32" or Aviation Shears
- Center Punch
- Safety Glasses
- 9" Socket Extension

**Level of Difficulty:** Moderate

**Pro Install Time:** 45 MINS.

**Novice Install Time:** 90 MINS.

**Warning:** Safety glasses should be worn at all times while installing this product.

MAX."
1. Determine if trimming is required on model by raising hitch into position. If needed, mark and trim lower fascia, as shown below, or remove lower fascia and return to owner. **Note:** Check for proper fit prior to trimming.

2. Raise hitch into position aligning the access hole with the forward most hole in hitch on both sides.

For more information log onto www.curtmfg.com, & for helpful towing tips log onto www.hitchinfo.com
3. Using the hitch as a template, mark the (2) drill holes in both frame rails using a center punch or marker.

4. Lower hitch and drill (4) 17/32" holes marked in Step (3).

5. Fishwire (4) 1/2-13 x 1 3/4" carriage bolts and SP6 spacers through the access holes and out drilled holes.

6. Reverse fishwire (2) 1/2-13 x 1 3/4" carriage bolts and SP6 spacers into the access holes.

For more information log onto www.curtmfg.com & for helpful towing tips log onto www.hitchinfo.com
7. Raise hitch into position, being careful not to push hardware inside of frame rail, and secure 1/2-13 flange nuts with 3/4" socket.

8. Torque all 1/2" fasteners to 110 ft-lbs.

Installation is now complete.

INSTALLATION STEPS

1. Determine if trimming is required on model by raising hitch into position. If needed, mark and trim lower fascia, as shown above, or remove lower fascia and return to owner. (See FACIA TRIM DETAIL)

2. Raise hitch into position aligning the access hole with the forward-most hole in hitch.

3. Using the hitch as a template, mark the (2) drill holes in each frame rail with a center punch or marker.

4. Lower hitch and drill the (4) 17/32" holes marked in Step (3).

5. Fishwire (4) 1/2-13 x 1-3/4" carriage bolts and SP6 spacers through drilled holes. (See FISHWIRE DIAGRAM)

6. Reverse fishwire (2) 1/2-13 x 1-3/4" carriage bolts and SP6 spacers into the access holes. (See REVERSE FISHWIRE DIAGRAM)

7. Raise hitch and secure with 1/2-13 flange nuts, being careful not to push hardware inside of frame rail.

8. Torque all 1/2" fasteners to 110 ft-lbs.

NOTE: DIMENSIONS ARE APPROXIMATE CONFIRM FIT PRIOR TO TRIMMING

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.
FRONT MOUNTED ACCESSORIES

1) Do not exceed front axle Gross Weight Rating (GAWR). Consult owners manual or specification plate located on driver’s door frame. Measure gross front axle weight by placing front wheels of loaded vehicle on a scale.

WARNING: Exceeding GAWR may overload the front axle and/or suspension. This could result in accident, property damage and personal injury.

2) Reposition front mounted license plate if obstructed.

3) Do not obstruct vehicle lights.

4) Allow free air flow into grille opening.

5) Rear wheel traction may be reduced. This could effect handling. Reduce speed and drive with caution.

6) Accessories extend front of vehicle. This may reduce approach angle. Use caution when parking and maneuvering.

7) Do not obstruct driver view.

VEHICLE RECOVERY AND WINCHING TIPS

1) Use OEM tow hooks, recovery eyes or a clevis mount for attachment of a tow strap or winch cable.

WARNING: NEVER use a ball and/or ball mount as an anchor point for tow strap or winch cable. Severe personal injury or death could result.

2) Observe winch manufacturer’s recommendations, cautions and warnings.

3) Attach return cable to tow hook or recovery eye when using a snatch block (See figure 1).

CAUTION: Do not attach return cable to winch mount. This may overload winch mount and/or front mounted receiver.

RATING

For Maximum line pull rating, winch cable must not exceed:
- 15 degree angle up or down from horizontal (See Figure 2).
- 45 degree angle left or right from straight ahead (See Figure 3).

CAUTION: Exceeding the maximum line pull rating may over load winch, winch mount, and/or front mounted receiver.
