### Installation Instructions

**Make:** Ford  
**Model:** Explorer  
**Style:** SUV  
**Years:** 1997-2001

#### Warning

Never exceed your vehicle manufacturer’s recommended towing capacity.

#### Installation Time

30 MIN.

#### Installation Requires:

- **Ratchet**
- **Socket**
- 7mm  
- 10mm  
- 3/4”
- **Torque Wrench**
- **Power Drill**
- **Drill Bit**  
- 9/16”
- **Die Grinder**
- **Safety Glasses**

#### Install Tips:

1. Before you begin installation, read all instructions thoroughly.  
2. To ease installation, 2 people may be required.  
3. Using proper tools will greatly improve the quality of the install and reduce the time required.  
4. Need help or have some questions? Call technical support at 800.798.0813

#### Level of Difficulty:

- **Easy**
- **Moderate**
- **Challenging**

#### Installation Steps:

- **Part Removal:** Remove air duct or radiator guard (if present).
- **Drilling Required:** Drilling required (some models).  
- **Fishwire Hardware**

#### Gross Load Capacity

- **Weight Carrying:** 3,500 lbs.  
- **Tongue Weight:** 350 lbs.  
- **Total Capacity:** 9,000 lbs max.

INSTALLATION WALKTHROUGH:

For more information log onto www.curtmfg.com, & for helpful towing tips log onto www.hitchinfo.com

1. If present, remove air duct or radiator guard by removing 3 or 4 fasteners. Return to vehicle owner.

2. Some models may require drilling or hole enlargement. Raise hitch into position and mark drill locations.
INSTALLATION WALKTHROUGH:

3. Lower hitch and drill or enlarge locations marked in step 2 using 9/16" dill bit or die grinder

4. If access holes are not present, enlarge the forward most mounting hole on each frame rail so that 1/2" hardware will pass through.

5. Fishwire hardware into position through access holes or holes enlarged in step 4. See FISHWIRE TECHNIQUE on page 2.

6. Raise hitch into position and secure to vehicle with 1/2" flange nuts. Torque all 1/2" hardware to 110 ft-lbs.
   Install is complete.

<td>1/2&quot; FISHWIRE</td>
</tr>
</tbody>
</table>

**FISHWIRE TECHNIQUE**

Insert coiled end of fishwire tool through hitch mounting hole in vehicle frame rail and out the access hole. Pass coiled end of fishwire through spacer and thread bolt into coiled fishwire. Pull fishwire, spacer, and bolt through frame and out mounting hole. Use fishwire to guide hitch during mounting and prevent loss of bolt/spacer inside frame rail. Note: fishwire should pass fishwire through end of frame.

**TOOLS REQUIRED**

- RATCHET
- SOCKET 7mm, 10mm, 3/4”
- TORQUE WRENCH
- DRILL (SOME MODELS)
- 9/16” DRILL BIT (SOME MODELS)
- DIE GRINDER (SOME MODELS)

**HITCH WEIGHT:** 36 LBS.

**INSTALL TIME**

- PROFESSIONAL: 20 MINUTES
- NOVICE (DIY): 40 MINUTES

**INSTALL NOTES:**

- REMOVE AIR DUCT OR RADIATOR GUARD (IF PRESENT)
- DRILLING REQUIRED (SOME MODELS)
- FISHWIRE HARDWARE
***DO NOT EXCEED VEHICLE MANUFACTURER'S RECOMMENDED TOWING CAPACITY ***.

FRONT MOUNTED ACCESSORIES

1) Do not exceed front axle Gross Weight Rating (GAWR). Consult owners manual or specification plate located on driver's door frame. Measure gross front axle weight by placing front wheels of loaded vehicle on a scale. 

WARNING: Exceeding GAWR may overload the front axle and/or suspension. This could result in accident, property damage and personal injury.

2) Reposition front mounted license plate if obstructed.

3) Do not obstruct vehicle lights.

4) Allow free air flow into grille opening.

5) Rear wheel traction may be reduced. This could effect handling. Reduce speed and drive with caution.

6) Accessories extend front of vehicle. This may reduce approach angle. Use caution when parking and maneuvering.

7) Do not obstruct driver view.

VEHICLE RECOVERY AND WINCHING TIPS

1) Use OEM tow hooks, recovery eyes or a clevis mount for attachment of a tow strap or winch cable. 

WARNING: NEVER use a ball and/or ball mount as an anchor point for tow strap or winch cable. Severe personal injury or death could result.

2) Observe winch manufacturer's recommendations, cautions and warnings.

3) Attach return cable to tow hook or recovery eye when using a snatch block (See figure 1).

CAUTION: Do not attach return cable to winch mount. This may overload winch mount and/or front mounted receiver. For Maximum line pull rating, winch cable must not exceed:

- 15 degree angle up or down from horizontal (See Figure 2).
- 45 degree angle left or right from straight ahead (See Figure 3).

CAUTION: Exceeding the maximum line pull rating may overload winch, winch mount, and/or front mounted receiver.
