This product complies with safety specifications and requirements for connecting devices and towing systems of the state of New York, V.E.S.C. Regulation V-5 and SAE J684.

| YEARS: 2016 | MAKE: NISSAN | MODEL: TITAN XD | STYLE: TRUCK |

**WEIGHT CARRYING:**
- TRAILER WEIGHT: 5000 LBS.
- TONGUE WEIGHT: 500 LBS.

**GROSS LOAD CAPACITY WHEN USED AS A STRAIGHT LINE PULL:** 9,000 LBS MAX.

**INSTALLATION TIPS:**
1. BEFORE YOU BEGIN INSTALLATION, READ ALL INSTRUCTIONS THOROUGHLY.
2. TO EASE INSTALLATION, 2 PEOPLE MAY BE REQUIRED.
3. USING PROPER TOOLS WILL GREATLY IMPROVE THE QUALITY OF THE INSTALL AND REDUCE THE TIME REQUIRED.
4. NEED HELP OR HAVE SOME QUESTIONS? CALL TECHNICAL SUPPORT AT 800.798.0813

**LEVEL OF DIFFICULTY:** EASY

**INSTALLATION REQUIRES:**
- 17mm 
- 9" 
- 19mm 
- SOCKET 
- SOCKET EXTENSION 
- RATCHET 
- SOCKET TORQUE ADAPTER 
- SAFETY GLASSES 
- TORQUE WRENCH 
- 19mm SOCKET TORQUE ADAPTER 

**VEHICLE PHOTO:**

**LEVEL OF DIFFICULTY:**
- EASY 
- MODERATE 
- CHALLENGING 

**HITCH ILLUSTRATION:**

**MAKE SURE YOUR HITCH MATCHES**

1. Remove two (2) hex bolts and one (1) tow loop from bottom of each frame rail and return to vehicle owner. These will be replaced with the included M12 hardware.

NOTE: CM-SP52 spacers will only be used for installation on PRO4X models. For all other models, follow remaining instructions disregarding use of CM-SP52 spacers.

2. Insert one (1) hex bolt, one (1) 1/2" conical toothed washer and one (1) CM-SP52 through rear end of each side plate slot. Slide hitch in over tow loop plate. Loosely insert hex bolt into forward most weldnut in each frame.
3. Slide hitch rearward into position. Place one (1) 1/2" flat washer on top of one (1) CM-SP52 and set on top of each side plate aligned with rear most hole.

4. Insert one (1) M12 hex bolt with one (1) 1/2" conical toothed washer through side plate, CM-SP52 spacer and 1/2" flat washer into each rear most weldnut.

5. Secure all M12 fasteners with socket wrench. A 19mm end wrench may be used to secure forward most bolt.

6. Torque all M12 fasteners to 86 ft-lbs. Use a 19mm socket torque adapter to torque front bolts.

3077 NISSAN TITAN XD

***DO NOT EXCEED VEHICLE MANUFACTURER’S RECOMMENDED TOWING CAPACITY***.

FRONT MOUNTED ACCESSORIES

1) Do not exceed front axle Gross Weight Rating (GAWR). Consult owners manual or specification plate located on driver’s door frame. Measure gross front axle weight by placing front wheels of loaded vehicle on a scale.

WARNING: Exceeding GAWR may overload the front axle and/or suspension. This could result in accident, property damage and personal injury.

2) Reposition front mounted license plate if obstructed.

3) Do not obstruct vehicle lights.

4) Allow free air flow into grille opening.

5) Rear wheel traction may be reduced. This could effect handling. Reduce speed and drive with caution.

6) Accessories extend front of vehicle. This may reduce approach angle. Use caution when parking and maneuvering.

7) Do not obstruct driver view.

VEHICLE RECOVERY AND WINCHING TIPS

1) Use OEM tow hooks, recovery eyes or a clevis mount for attachment of a tow strap or winch cable.

WARNING: NEVER use a ball and/or ball mount as an anchor point for tow strap or winch cable. Severe personal injury or death could result.

2) Observe winch manufacturer’s recommendations, cautions and warnings.

3) Attach return cable to tow hook or recovery eye when using a snatch block (See figure 1).

CAUTION: Do not attach return cable to winch mount. This may overload winch mount and/or front mounted receiver.

For Maximum line pull rating, winch cable must not exceed:

- 15 degree angle up or down from horizontal (See Figure 2).

- 45 degree angle left or right from straight ahead (See Figure 3).

CAUTION: Exceeding the maximum line pull rating may overload winch, winch mount, and/or front mounted receiver.

Curt Manufacturing LLC., warrants this product to be free of defects in material and/or workmanship at the time of retail purchase by the original purchaser. ---

**INSTALLATION STEPS**

1. Remove two (2) hex bolts attaching tow loop and one (1) tow loop from bottom of each frame rail and return to vehicle owner. These will be replaced with the included M12 hardware.

   **NOTE:** CM-SP52 spacers will only be used for installation on PRO4X models. For all other models, follow remaining instructions disregarding use of CM-SP52 spacers.

2. Insert one (1) hex bolt, one (1) 1/2” conical toothed washer and one (1) CM-SP52 through rear end of large slot in each side plate. Slide hitch in over tow loop plate. Loosely insert hex bolt into forward most weldnut in each frame.

3. Slide hitch rearward into position. Place one (1) 1/2” flat washer on top of one (1) CM-SP52 and set on top of each side plate, aligned with rear most hole.

4. Insert one (1) M12 hex bolt with one (1) 1/2” conical toothed washer through side plate, CM-SP52 spacer and 1/2” flat washer into each rear most weldnut.

5. Secure all M12 fasteners with socket wrench. A 19mm end wrench may be used to secure forward most bolt.

6. Torque all M12 fasteners to 86 ft-lbs. Use a 19mm socket torque adapter to torque front bolts.

FRONT MOUNTED ACCESSORIES

1) Do not exceed front axle Gross Weight Rating (GAWR). Consult owners manual or specification plate located on driver’s door frame. Measure gross front axle weight by placing front wheels of loaded vehicle on a scale.

**WARNING:** Exceeding GAWR may overload the front axle and/or suspension. This could result in accident, property damage and personal injury.

2) Reposition front mounted license plate if obstructed.

3) Do not obstruct vehicle lights.

4) Allow free air flow into grille opening.

5) Rear wheel traction may be reduced. This could effect handling. Reduce speed and drive with caution.

6) Accessories extend front of vehicle. This may reduce approach angle. Use caution when parking and maneuvering.

7) Do not obstruct driver view.

VEHICLE RECOVERY AND WINCHING TIPS

1) Use OEM tow hooks, recovery eyes or a clevis mount for attachment of a tow strap or winch cable.

**WARNING:** NEVER use a ball and/or ball mount as an anchor point for tow strap or winch cable. Severe personal injury or death could result.

2) Observe winch manufacturer’s recommendations, cautions and warnings.

3) Attach return cable to tow hook or recovery eye when using a snatch block (See figure 1).

**CAUTION:** Do not attach return cable to winch mount. This may overload winch mount and/or front mounted receiver.

RATING

For Maximum line pull rating, winch cable must not exceed:
- 15 degree angle up or down from horizontal (See Figure 2).
- 45 degree angle left or right from straight ahead (See Figure 3).

**CAUTION:** Exceeding the maximum line pull rating may over load winch, winch mount, and/or front mounted receiver.
