

HOLD DOWN STRAP

SNOWSPORT™ Hold Down Strap delivers consistent pressure to help your blade cut through compacted snow and heavy drifts for a cleaner scrape on concrete, asphalt, gravel and other surfaces. Quick to install, looping around the push frame and slide hinges for seamless integration with SNOWSPORT® Utility Plows, enhancing snow clearing efficiency.

See inside for instructions.

HOLD DOWN STRAP INSTRUCTIONS

NOTE: Recommended for SNOWSPORT® Utility Plows without SNOWSPORT™ Electric Plow Winch.

▲ WARNING: Do not apply down pressure when stacking snow or damage to vehicle may occur.

▲ CAUTION: Excessive down pressure may cause damage to surfaces and wear on rubber cutting edge.

SAFETY INFORMATION

Always follow safety information in SNOWSPORT® Utility Plow standard instructions.

IMPORTANT: Before installing and using strap, deburr any sharp edges along identified areas where strap touches.

NOTE: Ensure protective orange vinyl on strap faces down against deburred edges.

A. Insert pin through keyhole in push frame and strap loop.

B. Run strap behind and under push frame, then up through blade hinge.

C. Continue across and down through opposite hinge, then under and behind push frame.

D. Insert pin through keyhole and strap loop, set strap tension as needed using buckle.
