• Assists in removal of hard, compact snow
• Quick and easy to install
1. Insert pin through keyhole and strap loop.

2. Run strap behind and under push frame, then up through blade hinge.

3. Continue across and down through opposite hinge.

4. Insert pin through keyhole and strap loop, set strap tension as needed using buckle.

IMPORTANT: Before installing and using strap, deburr any sharp edges along identified areas where strap touches.

NOTE: Ensure protective orange vinyl on strap faces touches.
