ACCESS® LED LIGHT INSTALLATION INSTRUCTIONS

NOTE: For wire connections, soldering is recommended for best performance. Avoid using crimp on or tap splice style connectors.

NOTE: For best adhesion, air and surface temperature should be above 60 °F for at least 2 hours before adhering the LED light.

A. Clean area where LED light will be attached with soap and water or rubbing alcohol, wipe dry.

B. Peel protective layer from adhesive strip and adhere.

C. Connect RED wire to a 12V positive source.

D. Connect BLACK wire to ground.
